

3 Foldable Displays

Lama instant foldable display systems from **Trumari**, Seattle, are made of 100% recyclable materials said to be so compact and lightweight that most can be shipped in a container roughly the size of a large pizza box. Trumari's best sellers currently include the Three Shelf Cargo Display, designed to hold heavy loads like beverages, books or substantial packages; Ring Kiosks, with four double-sided columns and headers designed for presentations on the tradeshow or retail floor; and the five- to six-foot Standard Display, for general branding, promotional information and new-item launches.
